

Managed Services

Managed Services

IT Solutions' Managed Services Program ensures the security of your organization's mission-critical systems and data by designing and implementing a turn-key, scalable hardware and software maintenance program for systems on your premises. By selecting and implementing "Best-of-Breed" technologies, we oversee and are responsible for the complicated task of managing your systems needs, thus allowing your staff to concentrate on other business activities. Most organizations do not have the internal staff and resources to address information technology issues on a 24x7 basis and still have time to properly address the daily requirements of normal business operations. The option of improperly addressing or failing to address these issues could leave your organization susceptible to various threats in today's Internet-enabled business environment.

IT Solutions' team of security engineers and networking experts have many years of field experience in identifying and addressing risks in operating systems, applications and networking technology.

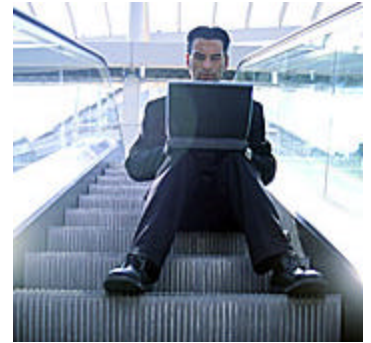

Since 2000 IT Solutions has been a leading technology services company. With deep industry expertise and proven experience in consulting and outsourcing, IT Solutions can mobilize the right people, skills alliances and technologies for your Managed Services.

Managed Network/Infrastructure Solutions

IT Solutions' Managed Solutions offerings are designed to provide clients with state-of-the-art technology without the burden and cost of developing the in-house expertise required to operate and manage the covered infrastructure. IT Solutions manages the covered system from an operating system and application level perspective. Our security experts maintain all system patches, updates and backups. Policy changes, upgrades and log analysis are components that require a significant amount of product knowledge and time to complete. IT Solutions' Managed Solutions will help lower your Total Cost of Ownership, while increasing the overall security of your business environment.

Why use ITS?

IT Solutions is a leading technology services company. Committed to delivering innovation, ITS collaborates with its clients to help them realize their visions and create tangible value. With deep industry expertise, broad resources and proven experience in consulting and outsourcing, IT Solutions can mobilize the right people, skills, alliances and technologies for your Managed Services. More than 80 percent of our work is with clients whom we've served before.

Our approach is to deliver innovation to clients by leveraging our industry knowledge, service offering expertise and insight into and access to emerging technologies. With this comprehensive approach, we are able to move clients forward in their business, from strategic planning to day-to-day operations. This often includes helping clients identify and enter new markets, increase revenues in existing markets, and deliver their products and services more effectively and efficiently.
