

Secured Remote Access

A Secure Gateway to the Internet

Organizations are looking increasingly to the Internet as the preferred network for application deployment due to the lower cost, greater geographic reach and faster implementation. IT Solutions Secured Access Remote Solution enables any organization to securely and simply deliver existing applications across the Internet, on demand, to any device.

This solution, which functions as a secure Internet gateway between Citrix MetaFrame® servers and client workstations, is simple to deploy, easy to use, reduces costs, provides ease in firewall traversal. All communication traversing the Internet is encrypted, thus ensuring privacy and integrity of information flow.

Secure data transfer

Citrix Secure Gateway is an enterprise-wide solution that protects a client's network infrastructure, data and applications. All Citrix ICA traffic traversing the Internet between client devices and the Citrix Secure Gateway server is encrypted using Internet-standard SSL technology, ensuring the secure transfer of data across public networks.

Easy Deployment

Citrix Secure Gateway eliminates the need to install additional client software (beyond the Citrix ICA client) and can easily traverse Internet firewalls. It is completely transparent to both applications and network devices.

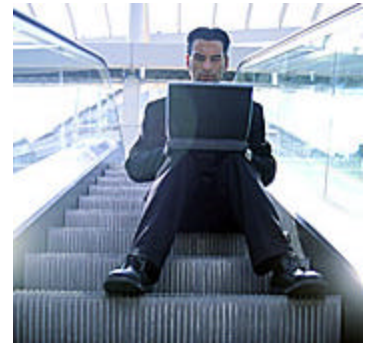

This solution removes the need to publish the address of every Citrix MetaFrame server across the Internet. It simplifies server management and provides a single point of access into the Citrix MetaFrame server farm. Citrix MetaFrame servers are hidden from the Internet and cannot be accessed directly.

Since 2000 IT Solutions has been a leading technology services company. With deep industry expertise and proven experience in consulting and outsourcing, IT Solutions can mobilize the right people, skills alliances and technologies for your Secured Remote Access.

For additional information about IT Solutions, please call 256-513-6413 or e-mail us at info@ITSHSV.com

Service Highlights:

- SSL 128-bit encryption
- High-performance gateway service
- Firewall traversal
- Simplified server certificate management
- Minimal client configuration
- Secure ticketing authority
- Citrix NFuse integration
- Strong authentication
- Connection logging
- Reliability and fault tolerance
- Highly scalable

Why use ITS?

IT Solutions is a leading technology services company. Committed to delivering innovation, ITS collaborates with its clients to help them realize their visions and create tangible value. With deep industry expertise, broad resources and proven experience in consulting and outsourcing, IT Solutions can mobilize the right people, skills, alliances and technologies for your Secured Remote Access. More than 80 percent of our work is with clients whom we've served before.

Our approach is to deliver innovation to clients by leveraging our industry knowledge, service offering expertise and insight into and access to emerging technologies. With this comprehensive approach, we are able to move clients forward in their business, from strategic planning to day-to-day operations. This often includes helping clients identify and enter new markets, increase revenues in existing markets, and deliver their products and services more effectively and efficiently.
