

## Wireless Technology

### Wireless Technology Services

#### The Wireless Challenge

Wireless communications present many distinct challenges, including the reality of multiple networks, multiple standard devices and protocols and the difficulty of maintaining communications within a specific coverage area. Other inherent challenges of wireless environments include narrower bandwidth, higher network latencies and unique wireless user needs. These complexities and the proliferation of various networks, standards and platforms are enough to confirm the worst nightmares of most IT managers. IT leaders simply need expert assistance resolving these wireless challenges and sorting out available options which meet their specific needs

A structured wireless LAN, with distributed intelligence, provides performance, security, reliability and scalability. With a keen understanding of the new emerging wireless technology standards, IT Solutions can assess your wireless needs and design and implement a Wireless LAN infrastructure that will enhance your business experience.

Since 2000 IT Solutions has been a leading technology services company. With deep industry expertise and proven experience in consulting and outsourcing, IT Solutions can mobilize the right people, skills alliances and technologies for your Wireless Technology Needs .
